## PROFICIENCY & SKILLS

HTML5 / CSS3 / BS3

JavaScript / jQuery

PSD2HTML

Responsive

PHP / MySQL

Thymeleaf

ON-PAGE SEO

CMS

GIT

## WORK EXPERIENCE

### Freelancer ( 2005 - Till now )

My passion for web development started many years ago. I continue to work as a freelancer on a few complex projects. This helps me to keep up with the new standards and technologies.

### Unisoft Engineering Ltd. ( October 2014 - March 2017 )

October 2014 I started to work for Unisoft Engineering Ltd. as a Web Developer. All the time I was writing a Front-End based on Thymeleaf which is a Template Engine for Java.

### RadioActive Ltd. ( April 2017 - Till now )

April 2017 I started my new job at RadioActive Ltd as Front-End Web Developer. The work there is connected with the project called Microweber. This is is a Drag & Drop Website Builder and CMS. My responsibilities in this project are a lot. I fixed a lot of bugs, I am creating new modules and perfecting existing ones, I am creating templates and a lot of other things. As ot date 10.02.2019 I have more than 380.000 lines code committed at GitHub for Microweber. Our small team managed to make the project well know and is often receiving nominations and awards in Bulgaria as an Innovative startup company.

## EDUCATION

### IT Class - 2003/2011

"Vasil Levski" Hight School - 2003/2011

### Computer Science - 2011/2015 (not graduated)

"St. Cyril and St Methodius" University of Veliko Turnovo

### Front-End (HTML5/CSS3) - 2014

SoftUni.bg
